Investor Education

Topic of the Month: Why SIPs Are Your Best Bet

SIP (Systematic Investment Plan) allows you to invest a fixed amount regularly in mutual funds, automating the process and making it easier to stay on track with your financial goals.

What is SIP?

» *SIP works by deducting a predefined amount from your bank account at regular intervals (monthly or quarterly) and investing the same in a mutual fund scheme of your choice.*

» *It ensures that you invest consistently, regardless of market conditions, instilling financial discipline and helping you build wealth over time.*

Benefits of SIP:

1. Disciplined Approach: SIP encourages regular investing, helping you stay consistent and build wealth over time.

2. Rupee-Cost Averaging: Volatile markets can work in your favor as SIP buys more units when prices are low and fewer when prices are high.

3. Flexibility: You can adjust SIP amounts, pause, or stop anytime to suit your financial needs.

4. Power of Compounding: With time, even small investments grow significantly.

Understanding Mutual Fund Categories:

Arbitrage Fund

An arbitrage fund invests predominantly in equity and equity-related instruments while simultaneously hedging its exposure through derivatives. This strategy aims to capitalize on price inefficiencies in the market.

Advantages:

1. Low Risk: Provides stability due to the hedging mechanism.

2. Tax Efficiency: Classified as equity for tax purposes, offering better tax treatment.

3. Liquidity: Easy redemption, making it suitable for short-term goals.

Taxation:

- *Short-Term Gains: Taxed at 20% on Capital Gains if held for less than 1 year.*
- *Long-Term Gains: If holding period is beyond 1 year, Capital Gains are tax-free up to ₹1.25 lakhs; above this, taxed at 12.5% without indexation.*

Performance:

Category	Plan	Returns (%)				
		3 Months	6 Months	1 Year	3 Years	5 Years
Hybrid - Arbitrage Fund	Regular	1.6	3.25	7.24	6.02	5.12

*Report Date: 01/01/2025, Returns over 1 year period are annualised returns.

Pro Tip: Arbitrage funds are ideal for parking surplus cash in a tax-efficient and low-risk avenue. Choose them when you expect market volatility or need short-term liquidity.
