PROPOSAL FOR INVESTMENT
(SYSTEMATIC TRANSFER PLAN)

Proposal in Brief

Under this strategy, principal amount is invested in a debt fund. Every month, 1% of the principal amount is transferred from debt fund to equity fund. This helps in averaging the cost of equity fund units. Since the transfer amount is small (just 1% of invested amount), any major fall in the markets in the short term doesn't hurt badly. Over medium to long term, equity markets tends to deliver better returns than debt market, and therefore the return of the total portfolio can go up.

Suitable for

Investors looking to benefit from equity markets over long period but do not want high volatility on their total investment in the short term.
