IS IT THE RIGHT TIME TO INVEST IN FD?

India has traditionally been a fixed deposit market and the trend continues. Indians prefer to park their savings mostly in fixed return instruments, largely in fixed deposits.

The year 2022 saw a huge variation in interest rates. From the lows of 5% for 1 year FDs, they currently stand at around 7-8%, almost 200 to 300 basis points higher. This is mostly attributed to US markets which have seen unprecedented rise in interest rates resulting in rate hikes across the world.

Given below is a chart of historical Bank FD rates in India.
